

TUFFLEX®

Unique, Fast-Curing, Protective and Decorative Resilient
Waterproofing Systems

Mono-Mat Seamless Sanitary System

Monolithic in-place mat application:

- ✓ Seamless finish seals out dirt & germs - providing a healthier environment.
- ✓ Covers up walls and columns to form a seamless edge finish.
- ✓ No seams means the area is easier to clean and sanitize = labor savings.
- ✓ Can be applied any needed thickness.
- ✓ Meets USDA criteria as per:
Food Safety and Inspection Service
(FSIS) Directive 11.000.4

Available in:

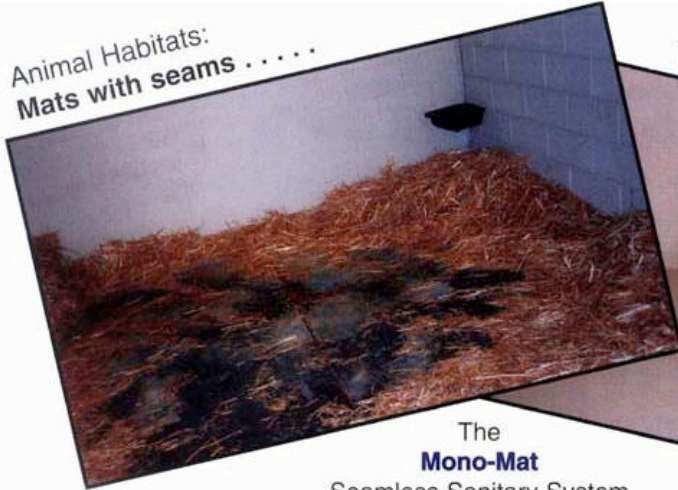

- Different surface textures available depending on specific site needs.
- Various color choices.
- Differing degrees of softness and hardness depending on needs.

**Offers unparalleled flexibility in
designing your animal habitat
flooring and waterproofing needs.**

Seneca Park Zoo - Rochester, NY
(2 year-old 1/2-inch thick Mono-Mat installation)

Animal Habitats:
Mats with seams

. No seams!
TUFFLEX Mono-Mat installation

The
Mono-Mat

Seamless Sanitary System

keeps the animal waste and potential germ problems
up on the surface where cleaning is quicker and more effective.

This installation solved **two** problems: The rough and cracked concrete in the alligator pen was leaking water and abrading the bottoms of the alligators' paws (feet, fins, claws?) which were then becoming infected. A TUFFLEX waterproofing membrane was applied with a semi-smooth surface which solved both problems.

Valuable animals are an investment worth protecting from what may lurk in the hard-to-clean mat seams... let alone what is hidden underneath the mats! (Some things you just don't want to know!)
